

Task	Subtasks	Description of Subtask	Assigned Developer
		<b><i>Opened by PlanitRunner.main()</i></b>	
Main Window:	User Interface Cleanup	Resize window based on screen size, and properly center text.	Lupe Jimenez
	"Submit Activity" Button	When button is pressed, creates a new Activity() and sets .name, .maxTime, .idealTime, and	Sebastian Park
	with appropriate fields.	.maxCost properties of the Activity based on user input to fields, and adds the activity to	
		PlanitRunner.database. (Plus exception handling)	
	Current Activities Button	Open a new window (like the one opened by the "Generate Activity Plan" Button	Shayan Shaikh
Current Activities Window:		<b><i>Opened by "Current Activities" button, references PlanitRunner.database for data. Maybe we could generalize the NewWindow class for all windows? Just a thought!</i></b>	
	User Interface Cleanup	(Same as above, hopefully code can be re-used/generalized) + Add ability to scroll down.	Shayan Shaikh
	Database Display	Display elements of PlanitRunner.database in a table, with the ability for the user to edit the	Sharon Wong
		fields.	
	"Remove Activity" X	When the user clicks an "X" icon next to a given row, remove the given activity.	Sharon Wong
	"Save Changes" Button	Updates PlanitRunner.database with the new version of the table, after user has edited fields	Devon Hubert
		and/or removed activities. (Can replace database with new ArrayList<Activity>, or find a more	
		efficient alternative if possible.	
Activity Plan Window:		<b><i>Opened by "Generate Activity Plan" button, which will also call Plan.generatePlan()</i></b>	
	User Interface Cleanup	(Same as above, hopefully code can be re-used/generalized) + Add ability to scroll down.	Lupe
	Activity List Display	Display the list of activities generated by the Plan.generatePlan() algorithm (not yet written).	Devon Hubert
		Can use a temporary algorithm that generates a set list of activities for testing instead.	
	Total Time/Total Cost	Calculate/display the total time and total cost of the selected ArrayList<Activity> at the bottom.	Lupe J
	"Save Plan" Button	Create a dummy button for use later.	Lupe J
	"Print Plan" Button	Create a dummy button for use later.	Devon Hubert
